EXPERIENCE

Packaged App Development Associate

Accenture

📅 Feb 2024 - Present

📍 Bangalore

- Recently joined the team working on the Accenture NewsPage Distribution Management System.
- Currently exploring various parts of the project to understand its functionalities and architecture

Fellowship in Software Development(Full Stack)

Crio.Do

📅 Mar 2022 - Feb 2023

📍 Remote

- Implemented several applications using MERN stack.
- Got some experience with Software Development Life Cycle(SDLC).
- Tech Stack: Software Development · MERN Stack

CODING PROFILES

- Solved 700+ problems on [Code Studio](#) and [LeetCode](#).
- Scored 600+ points on [Geeks for Geeks](#).

TECHNICAL SKILLS

• Languages

C++, JavaScript, HTML, CSS

• Frameworks

React.js, Node.js, Express.js

• Databases

MongoDB, MySQL

• Tools

Visual Studio Code, Postman, Git

• Others

Data Structures and Algorithms

COURSEWORK SUBJECTS

- Operating System
- Computer Networks
- Object Oriented Programming
- Database Management System

EDUCATION

B.Tech. (ECE) - 9.25 CGPA

Madanapalle Institute of Technology and Science

📅 2019 - 2023

📍 Madanapalle, Andhra Pradesh

Intermediate - 9.75 CGPA

📅 Grad. 2019

Secondary - 10 CGPA

📅 Grad. 2017

PROJECTS

[XFlix](#)

🔗 [Github](#)

[Live Link](#)

React.js | Node.js | Express.js | MongoDB | REST API

XFlix is a platform which hosts videos by using external video links (eg: Youtube).

- Built a **responsive front-end** for the website.
- Implemented **REST APIs**(GET, POST, PATCH) for the back-end.
- Added features like "title search", "filters" etc.
- Utilized MongoDB to persist video data.

[QKart Back-end](#)

🔗 [Github](#)

[Live Link](#)

Node.js | Express.js | MongoDB | Jest | REST API

- Built a set of **REST APIs** from login till check-out for an E-Commerce application.
- Implemented **JWT Tokens** and **Password hashing**.
- Utilized **Mongoose ODM** and performed **CRUD** operations on the database.
- Wrote **unit and integration tests** to test the implementation.

[QKart Front-end](#)

🔗 [Github](#)

[Live Link](#)

React.js | Material UI | REST API

****This project is different from the above one.****

- Built the **frontend** for an E-commerce application.
- Implemented the core logic for **authentication, shopping cart** and **checkout**.
- Utilized REST APIs to obtain data served by the back-end server.
- Implemented **debouncing** to **reduce API calls**.

[My Portfolio](#)

🔗 [Github](#)

[Live Link](#)

HTML | CSS | JavaScript | JQuery

- Built a portfolio website to showcase my works.
- Visit this to see my other projects
